## Task 2: Prime Numbers

Please cut this page out and stick it into your homework book.

# Prime Numbers

A Prime Number is a number which can **only** be divided equally by 1 or itself.

eg. 7 is a prime number because only 1 and 7 will divide into 7 equally

Find all the prime numbers by colouring all the times tables. You should then be left with all the prime numbers. Start with the two times table – but do not colour the 2 – why??
